

Acronis® True Image™ 2014

Full system backup, recovery and share - anytime, anywhere

Are you prepared for digital disaster? At any moment, you could experience a disk failure, virus, natural disaster or accidentally delete precious files, such as family photos, videos or financial data. To completely protect your PC, use Acronis® True Image™ 2014. Back up to the secure Acronis Cloud and you can easily share photos or any other files, and access your data from any web browser or mobile device (iOS and Android).

Based on Acronis' patented disk imaging and bare metal restore technologies, Acronis True Image 2014 gives you reliable backup and recovery of your entire system, including email, music, photos, videos, documents, personal settings and all applications. From our intuitive graphical interface, you can easily define where to backup – locally and/or online – and how often.

It only takes a few easy steps to create a complete copy of your hard drive. If you lose an important file, you can recover it quickly and easily. And you can easily synchronize and share files between local and network folders, multiple household PCs and mobile devices via the Acronis Cloud. Browsing shared data and downloading it from the Cloud has never been faster or easier. With Acronis True Image 2014 image backup to the cloud, a complete copy of your entire Windows system is always available to you, without the need for locally attached storage.

Sharing files with others is easy too. By creating permanent links to specific files or folders you can share data with anyone, even non-Acronis users.

Nonstop Backup™ delivers continuous system and data protection, so you never lose valuable data. Advanced scheduling minimizes the time it takes to configure and automate backups.

Acronis True Image 2014 is a powerful and complete way to protect your PC, synchronize your files and share with your friends and family. **Try it today!**
