

Acronis® vmProtect™ 7

The Best Backup Solution for VMware® vSphere®

You've started virtualising your servers and are planning next steps. Your critical data and applications that used to run on 5, maybe even 10 machines now run together on a single server. What's your tolerance for downtime? A day? An Hour? How about zero? You say you don't have time right now to address backup and recovery of your virtual machines (VMs)? **Think again.**

Acronis® vmProtect™ 7 is the fastest and easiest to use backup & recovery solution for VMware® you can buy.

User-Friendly Web interface.

It takes only about five minutes to install and begin using Acronis vmProtect 7.

Why use vmProtect 7?

- **Installs in minutes** as either a Virtual Appliance or on any server or PC running Windows. Agentless backup & recovery means you can quickly begin protecting your VMs.
- **Extremely easy to use.** Manage backup & recovery from VMware vCenter™ Server or using vmProtect 7's intuitive web interface. It's your choice. Either way, vmProtect 7 guides you through the backup process and makes recovery of an entire VMware vSphere ESXi host, VMs, or individual files as easy as clicking a mouse.
- **Recover an entire Microsoft® Exchange Server database or individual items** from a VM backup such as mailboxes, emails, and contacts.
- **Agentless Replication** of your VMs onto another host provides additional protection and even faster recovery in case of disaster.
- **Bare Metal Recovery of an entire VMware vSphere ESXi host** which includes the binaries for the VMware hypervisor, configuration settings, and all VMs managed by the hypervisor - to the same machine or a different bare metal machine. Most other solutions can recover only virtual machines.
- **Disaster Recovery Plan** is generated automatically and shows exactly what to do in case of disaster.

Other Good Reasons to Buy Acronis vmProtect 7

Compression and built-in deduplication removes unnecessary data from the backup and reduces the amount of storage required for the backup file.

Secure Backup and Data Verification. Government-grade 256-bit data encryption ensures that only you can access your data, and verification confirms the integrity of the backup.

Quickly Recover a VM by simply running the VM from its backup without having to do a full restore.

Seamless integration with the cloud. Optional vmProtect Online storage subscription available from Acronis can backup your data offsite for guaranteed access in case of a site-level disaster.

Unlimited migrations of physical or virtual servers to a VMware VM helps accelerate your virtualisation.

One flat price per CPU makes it really affordable to get started.

“VMware Ready” certification is pending

The Best Backup & Recovery Software for VMware vSphere That Does It All

Improves TCO: Affordable, intuitive solution gets you started backing up your VMs quickly.

Shortens RTO: Instant recovery of VM by simply running backup image without full restore.

New Features in Acronis vmProtect 7

vCenter Integration

Perform backup and recovery tasks from VMware vCenter.

Replication

Create and incrementally update a copy of your VM on another host for faster recovery in case disaster strikes.

Recover Exchange Objects

Recover an entire Microsoft Exchange Server database, or just the mailboxes, emails, contacts, or other items you need.

Disaster Recovery Plan

automatically creates documentation of the steps to recover.

Bare Metal Recovery

Your entire VMware ESXi v4.1 or v5.0 host can be recovered to another machine, even if dissimilar to source machine.

Cloud Storage Integration

Seamless integration with optional vmProtect Online cloud storage subscription enables you to backup offsite to a datacenter without having to purchase and manage server hardware yourself.

Other Key Features

Two Options for Easy Deployment

Choice of deploying as a Virtual Appliance or on any server or PC running Windows.

Intuitive Web-Based User Interface

Remotely perform all tasks from anywhere using just a web browser. The dashboard view, alerts, and email notifications keep you informed of the status. (Or run Acronis vmProtect 7 from VMware vCenter).

Optimised for VMware

Leverages VMware vStorage APIs for Data Protection (VADP) for agent-less LAN-free backup & recovery. Changed Block Tracking (CBT) reduces traffic on LAN and load on ESX(i) hosts.

Efficient, Secure Backup

Options for excluding files, built in deduplication, simultaneous backup, compression, and backup verification ensure optimal use of storage and memory resources and prevents unauthorised access.

Rapid Recovery of VMs

Simply run the VM from its backup for fast recovery without having to perform full restore. Recover images, individual files, or Microsoft Exchange items.

Accelerate P2V Virtualisation on VMware

Reliably convert an unlimited number of physical or virtual servers to VMware VMs to accelerate your virtualisation initiatives. (Ex. Convert a Hyper-V VM or VM running on the free VMware vSphere Hypervisor™ (ESXi) version to a purchased version of VMware vSphere)

Integration with vmProtect Online Cloud Storage

Seamless integration with optional subscription stores your data offsite to a datacenter.

System Requirements

Agentless backup & recovery for VMware vSphere 5.0, 4.1 and 4.0. ESX and ESXi hypervisors are supported except for the free VMware vSphere Hypervisor™ (ESXi) version.

VMs can run any guest operating system supported by VMware.

Web Browsers

- Microsoft® Internet Explorer® 7 or later
- Mozilla Firefox 3.5 or later
- Safari® 5
- Google Chrome™ 10 or later
- Opera™ 10 or later

Windows Machines - If not installing as a Linux Virtual Appliance directly on server hardware, can install onto x86 (32 bit) and x64 (64 bit) versions of:

- Microsoft® Windows Server® 2008/2008 R2
- Microsoft® Windows Server® 2003/2003 R2
- Microsoft® Windows® 7 Professional / Ultimate
- Microsoft® Windows Vista® Business / Ultimate
- Microsoft® Windows® XP Professional SP2+

Microsoft® Exchange Server 2010, 2007, or 2003 SP2+
