- About Acronis 8

Introduction

This document contains information about compatibility of tape drives, tape libraries, virtual tape libraries with Acronis Backup Advanced products suite.

All devices listed in this document are claimed as supported. It means that work of these devices was tested and confirmed with the Acronis Backup software. If not stated otherwise, device is compatible with any Acronis Backup product version.

Verification of supportability was ensured by testing performed by Acronis, reports sent to us by partners and customers from [Acronis Hardware Compatibility Tool](#), customers participated in Acronis Customer Experience Program (ACEP), as well as vendor's compatibility reports.

If you don't find your device in the list, it does not mean that it is not supported. Acronis Backup support all SCSI-compliant devices with any physical connections (FC, SAS, USB, etc.). Please, refer to [User Guide](#) for more information on working with tape libraries, standalone tape drives and VTLs.

NOTE: If your device works properly with Acronis Backup product and you want it to be added the list, please submit the request via email HCL-tapes@acronis.com. You can also check compatibility without product installation using [Acronis Hardware Compatibility Tool](#).

This information is intended to provide guidelines as to the types of technologies that the Acronis Backup version 11.7 and 12.5 generally supports. However, each system and environment is unique and simply because a technology is listed in this document, it does not guarantee and warrant that the products will be function as designed (for example, not all features may be available).

There is no express or implied warranty of any kind established by this document, any warranty is set forth in the terms of services, end user license agreement and licensing policies accompanying the product. We encourage you to try our software before purchasing to ensure that it is compatible with your environment.

About Acronis

Acronis sets the standard for new generation data protection through its backup, disaster recovery, and secure access solutions. Powered by the AnyData Engine and set apart by its image technology, Acronis delivers easy, complete and safe backups of all files, applications and OS across any environment—virtual, physical, cloud and mobile.

Founded in 2002, Acronis protects the data of over 5 million consumers and 300,000 businesses in over 130 countries. With its more than 100 patents, Acronis products were named best product of the year by Network Computing, TechTarget and IT Professional and cover a range of features, including migration, cloning and replication.
