PARTNER PROGRAM

for Cloud

This document provides information about the Partner Program benefits and requirements for Acronis Service Providers.

Backing up your ambitions!

“ **Dear current and future partners,**
2016 will usher in exciting new opportunities for Acronis Partners. Now more than ever, data protection is critical for all companies and individuals. Companies are bursting from the growth of data and relying on that data to operate and guide their businesses.

Globally, individual consumers now live a “Digital Life” and store nearly a terabyte of data on their PCs and devices. In the near future, “gigabytes” and “terabytes” will yield to the terms “petabytes” and “exabytes”. This exponential data growth is challenging IT organizations to maintain effective data protection, data access and high availability, putting their business continuity at risk. To address these risks, IT organizations are transforming how they do business and turning to cloud solutions that offer turnkey data protection services. This creates new revenue opportunities for Service Providers who can deliver the best in class Acronis cloud solutions.

Acronis has expanded its Global Partner Program to support Cloud Partners. Now you can deliver Acronis cloud solutions, receive financial rewards and access key resources to strengthen your competencies. Whether you are already a member of the Acronis Global Partner Program or are considering integrating cloud solutions into your core business offerings, the newly expanded partner program will help position your business for maximum success and profitability.

These are exciting times. We at Acronis are thrilled to be leading the industry with our top-rated cloud solutions. We invite you to review our extended Acronis Global Partner Program and select the level that is right for you.

Chris Hilderbrand, Vice President, Global Channel Sales

“ *Based on our proven AnyData Engine, Acronis delivers a world-class hybrid data protection solution specifically for Service Provider partners. Coupled with our flexible ‘pay-as-you go’ model that allows you to earn more as you grow, Acronis is providing Service Providers everything they need to earn greater share of customer wallet and keep their customers protected.* ”

John Zanni, Chief Marketing Officer and Sr. Vice President of Cloud and Channel Strategy

Differentiate your business with trusted technology

Customers have many choices. Acronis helps you differentiate your business and simplify their choices. Since 2003, Acronis has been recognized around the world for its leadership in technological innovation. Today, Acronis protects the data of more than 5 million consumers and 500,000 businesses in over 130 countries. With products developed for small and medium business environments, and solutions that solve specific data protection problems for the enterprise, Acronis' new generation technologies simplify protection of critical data.

This not only improves IT productivity and business uptime, it also reduces management complexity and increases return on investment. Leveraging the power of the Acronis AnyData Engine, Acronis Cloud Solutions provide all the unique features offered in Acronis' on-premise backup products without the need for the customer to invest in software, on-premise storage, and internal resources to manage the solution. This allows you to solve your customers' data protection problems quickly and efficiently while enabling you to improve customer retention and lifetime value.

Acronis Cloud Solutions for Service Providers

As an Acronis Cloud Partner, you gain the ability to sell Acronis Backup Cloud and license Acronis Backup Advanced and Acronis Backup Advanced for vCloud through the Acronis Service Provider License Agreement (SPLA).

Acronis Service Provider License Agreement

The Acronis Service Provider License Agreement (SPLA) is aimed at select Service Providers who want to license and host the latest eligible Acronis software products to provide backup and recovery services to end customers, direct and/or via resellers.

To build a strong, straightforward business case for your service, you need a solution with low entry costs and pay-as-you-grow scalability. With the SPLA, Service Providers can license Acronis products on a monthly basis to provide backup, deployment and disaster recovery-as-a-service solutions to their end customers. The Acronis SPLA supports a variety of backup scenarios to help you provide highly customized and robust solutions. [Learn More](#)
