

Acronis® Online Backup

Safeguard Your Important Data with Secure Online Backup

Today, most people keep their valuable information on their personal computers and laptops. Unfortunately, sometimes bad things happen. Files can be deleted or corrupted; laptops and PCs crash and can be stolen. Real disasters, like home fires and floods happen. How much are your documents, financial information, music and digital family pictures worth? What if they were gone forever?

Safeguard your critical documents on up to 5 home PCs or laptops with an online copy of your files.

Simple, Automated, Secure Online File Protection - Protect your digital life and information with Acronis Online Backup. This service provides you with your personal digital safety deposit box.

Your Data Wherever You Are - Once the files are backed up online, you no longer have to carry your laptop everywhere. When you need your files, you can download them remotely from any internet-connected PC, not just the original one. And the process is easy – just a couple clicks and you have access to all of your documents.

Fast and Secure – Combine local and online protection for the ultimate in data protection - Acronis is the leading provider for data protection of laptops and PCs. Over 3.5 million customers use Acronis True Image Home for backup to a local storage device. For the ultimate in data protection, Acronis True Image Home and Acronis Online Backup are integrated and share a common user interface. Acronis True Image Home provides the fastest file restore and the ability to recover the entire PC, including the operating system. Acronis Online Backup provides that remote location data protection in case of theft or home disaster.

Install and Configure in Just a Couple Minutes - Simply choose the files and folders to backup, schedule the backup time and that's it. Acronis Online Backup does the rest. Users can "set it and forget it."

Data Privacy with Government-Grade Encryption - Your information belongs to you and no one else. Acronis uses industry-leading data encryption for your privacy and protection.

Multi-PC backup - Many families have multiple PCs and laptops in their household. Acronis Online Backup enables you to protect up to 5 PCs and laptops in your home with the same account. Don't wait until it is too late to protect your critical information.
