 - Office 365 OneDrive
 - Office 365 SharePoint Sites
 - Web Hosting Servers
- Resource usage synchronization with Acronis Data Cloud

Fixed issues

- [APSOB-4707] Link to download agent is not personified.

Known Issues and Limitations

- Direct upgrade to version 2052 is supported only from versions 1994, 1997 and 2007. If you have a version less than 1994 installed, you need to update to 1994 prior to updating to 2052.
- PHP 5.6 only is supported.
- In case you are using OSA 7.x and the current version of Acronis APS is lower than 1884, please involve Odin to the update and refer to <https://kb.odin.com/en/131431>.
- Odin Automation 6.0, 7.0, 7.1, 7.2 and 7.3 are no longer supported.
- Provisioning of new subscriptions will fail after upgrade to 1327+ version if service templates do not include all required resources. Please refer to Post-upgrade actions in the Deployment Guide for additional information.
- [APSOB-5489] Unable to change quota for a service user with unlimited quota.
- [APSOB-5452] After upgrade, WebHostingServers quota is set to zero for a reseller even if embedded subscriptions exist where WebHostingServers quota is more than zero.
