Release notes for APS 2.0.4

Release date: February 12, 2020

Build: 2104

Supported platform version: Acronis Cyber Cloud 7.9 or later

With this update, Acronis APS package brings a security enhancement found in the previous release.

Fixed issues

1. [APSOB-6030] Security issue fixed

Known issues and limitations

1. Direct upgrade is supported only from version 2.0.3 (build 2070). If you have a version less than 2.0.3 installed, you need to update to 2.0.3 first.
2. PHP 5.6 only is supported
3. In case you are using OSA 7.x and the current version of Acronis APS is lower than build 1884, please involve Odin to the update and refer to https://kb.odin.com/en/131431
4. Odin Automation 6.0, 7.0, 7.1, 7.2 and 7.3 are no longer supported
5. Provisioning of new subscriptions will fail after upgrade to build 1327+ , if service templates do not include all required resources. Please refer to *Post-upgrade actions* in the Deployment Guide for additional information
6. [APSOB-5489] Unable to change quota for a service user with unlimited quota
7. [APSOB-5452] After upgrade, WebHostingServers quota=0 for reseller even if embedded subscriptions exist where WebHostingServers quota > 0
