Acronis Tech Training *Plus*

Apply your knowledge!

In the extended technical training you can prove what you have learned! You can test your profound knowledge of Acronis technologies in a virtual test environment. Several disaster recovery scenarios for your specific IT infrastructure are simulated. You will have to install and configure the solution components and conduct different backup and recovery scenarios. The emphasis is set on flexible recovery to dissimilar hardware using Acronis Universal Restore.

Become an experienced Acronis Pro!

During two days you can apply your knowledge in following fields:

- Consolidation of knowledge by practical examples
- Simulation of disaster recovery scenarios
- Risk-free exercises in a virtual test environment
- Flexible recovery using Acronis Universal Restore

Contents

- Installation and configuration
    - Acronis True Image 9.1 Enterprise Server
    - Acronis True Image 9.1 Workstation
- Hardware-independent system recovery
    - Acronis Universal Restore
- Solution components
    - Acronis License Server
    - Acronis Management Console
    - Acronis Backup Server
    - Acronis Group Server
    - Acronis Boot Medium
- Strategies for imaging, backup and archiving
- Practice-oriented versions of recovery
- Questions and answers

Target Group

- System and network administrators
- System engineers
- Backup administrators

Prerequisites

- Microsoft Windows: proficient knowledge
- Networks, computer hardware, databases: good knowledge
- Linux and DOS: basic knowledge

Participants

Maximal 15 persons (12 in Switzerland).
Incoming registration is deciding.

Duration

2 days, 9 a.m. – 5 p.m., breaks:
10:30 – 10:45, 12:30 – 13:30, 16:00 – 16:15

Methods

Lecture with demonstrations and practical exercises

Fees

840 EUR (1,394 CHF) per participant plus VAT, incl. beverages and lunch, incl. training handbook

Location

Details of respective training location are sent with the order confirmation.

Dates
