ACRONIS TRUE IMAGE 2021 BETA

Reviewer's Guide

Dual headquarters
in Switzerland and Singapore

Welcome to the Beta Program

Welcome to the first public Beta of the Acronis True Image 2021!

This Reviewer's Guide will help you learn more about the new features and provide some useful tips on trying them out. We would greatly appreciate if you tried all the features and shared your opinion with us.

Beta Program details

- Protection of up to 3 computers with 1 TB of Acronis Cloud storage total (valid until the final product release)
- Offered in English only
- Does not affect your current subscription or perpetual license, but installing the Beta will rewrite any version of Acronis True Image you have installed

To get a Beta key

- Register in the [Acronis True Image 2021 Beta Program](#)

For more information on the Beta program, please, visit the [Beta FAQ](#).

NOTE: Please understand that this is a Beta version and the software may contain some issues. This version of Acronis True Image is confidential and must not be distributed to other users without the prior written permission of Acronis.

What's New in Acronis True Image 2021 Beta

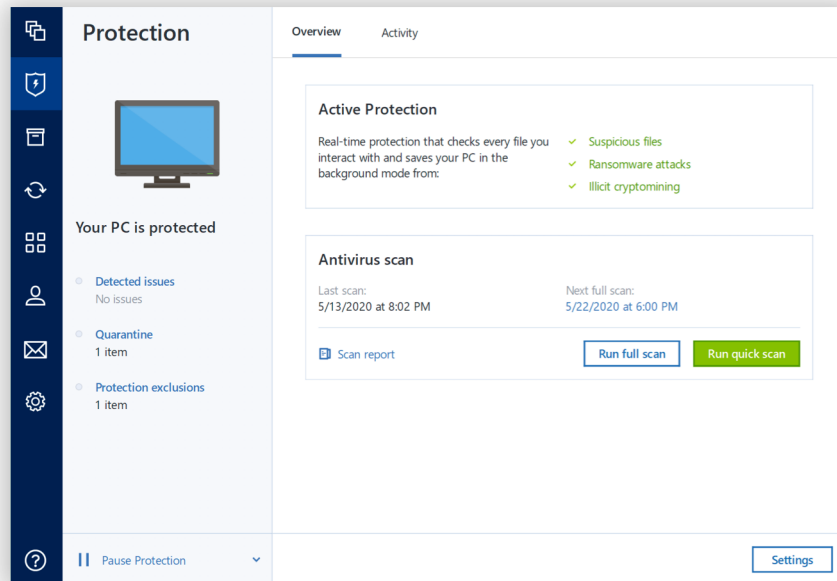

- Armed with signature-based and behavioral anti-malware defenses, the [evolved Acronis Active Protection](#) defends you not only from ransomware but from all the other malware types.
- [Redesigned Web Restore](#) allows to access your data in the Acronis Cloud faster and share it securely.
- Acronis True Image 2021 in [macOS Dark Mode](#) helps reduce eye strain for those using Dark Mode as a default macOS appearance.
- New backup format (.tibx) backups received the ability to be [mounted, moved, renamed, and converted to the .vhd format](#).
- [Replication](#) can now be easily resumed which helps increase replication stability while working on unstable Internet connections.
- [Quick validation](#) ensures that the latest backup version can be safely recovered and does not take much time doing it.

Anti-malware Protection

With the newly integrated Anti-malware Protection, you receive **complete protection from any threat** – Acronis True Image is there for you whether your hard disk was broken or your computer was attacked by a virus.

Components of the Full Anti-malware Protection

- Enhanced Active Protection
 - Now includes protection from malware
 - Runs in real time to check all the files you are interacting with
- Antivirus scan
 - Searches for viruses through all the files on your computer

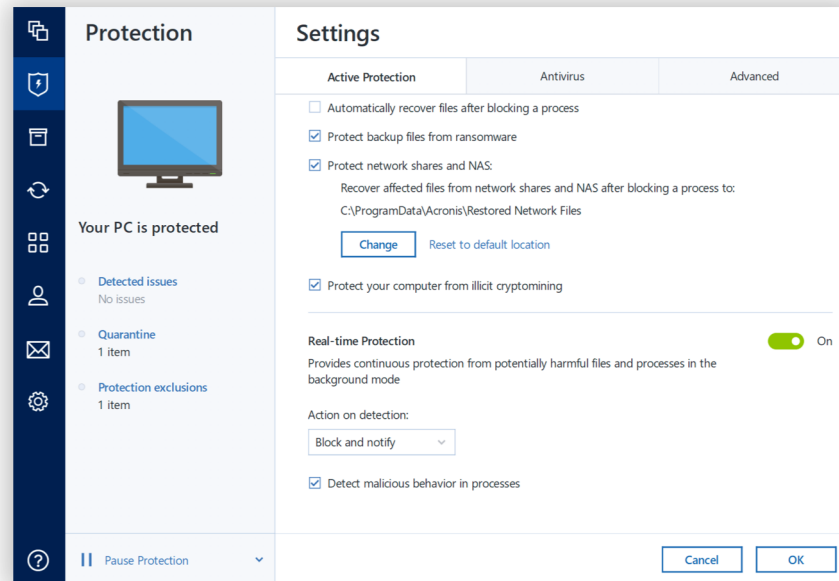

Anti-malware Protection – How to Try

Below are several things that you could try to test the new Anti-malware Protection.

The provided antivirus test file will not harm your computer.

How to try

- Go through Settings and try changing them
- Launch an antivirus scan
- Download the test virus file [here](#) and launch it to see how it is moved to quarantine
- Check whether your protection is up to date

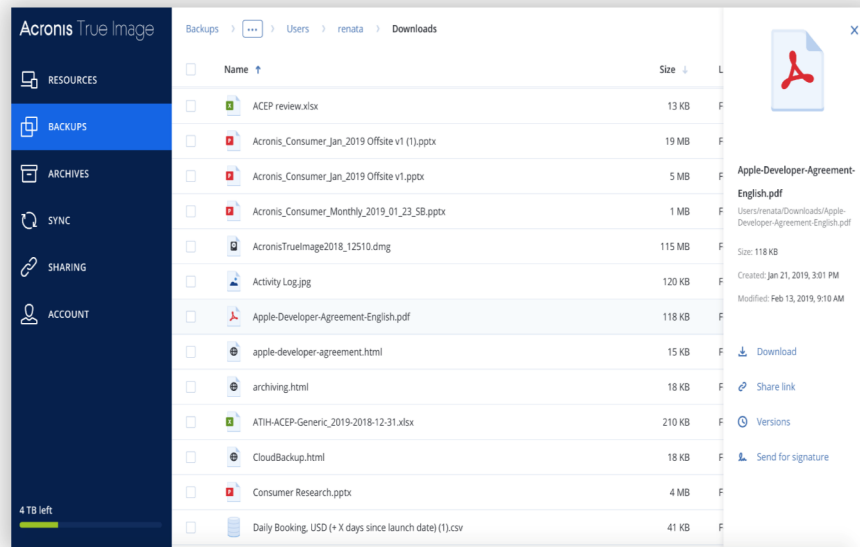

Platforms: Windows, Mac

Web Restore Redesign

The Anywhere Access to Cloud data has become faster, more secure and convenient.

How to try

- Create a backup to Acronis Cloud and click **Browse my data** in the **Account** tab to browse it in Web Restore
- Navigate through your data and check the detailed information on files and folders
- Share a password protected file

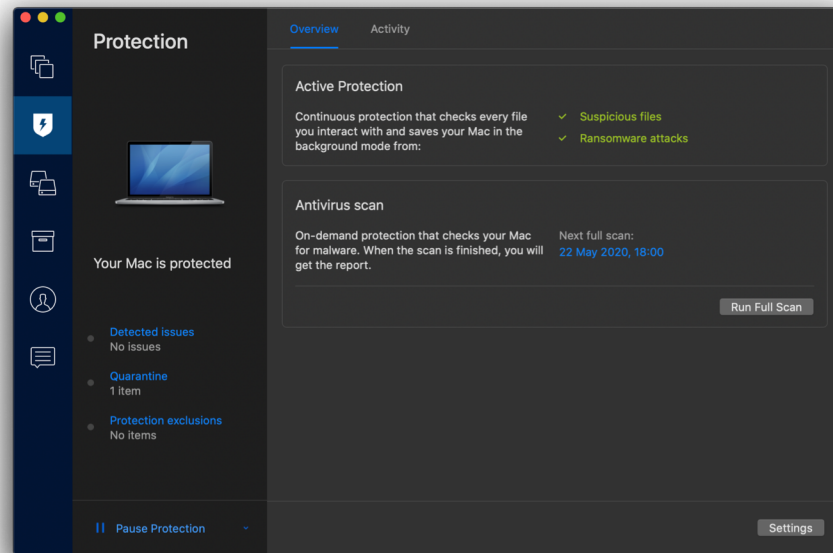

Dark Mode for Mac

We added support for macOS Dark Mode to ease the lives of all those using Dark Mode as their default appearance.

How to try

- In macOS, open **System Preferences**
- Navigate to **General** and select **Dark** appearance
- Open Acronis True Image 2021

Platform: Mac

Improvements in the New Backup Format

Added the following highly requested features for the new backup format (.tibx) backups

- Rename (Windows)
- Mount (Windows)
- Move (Windows)
- Convert backup to VHD (Windows)
- Backup comments (Windows, Mac)
- Last backup version validation (Windows)
- Resumable image backup replication (Windows, Mac)

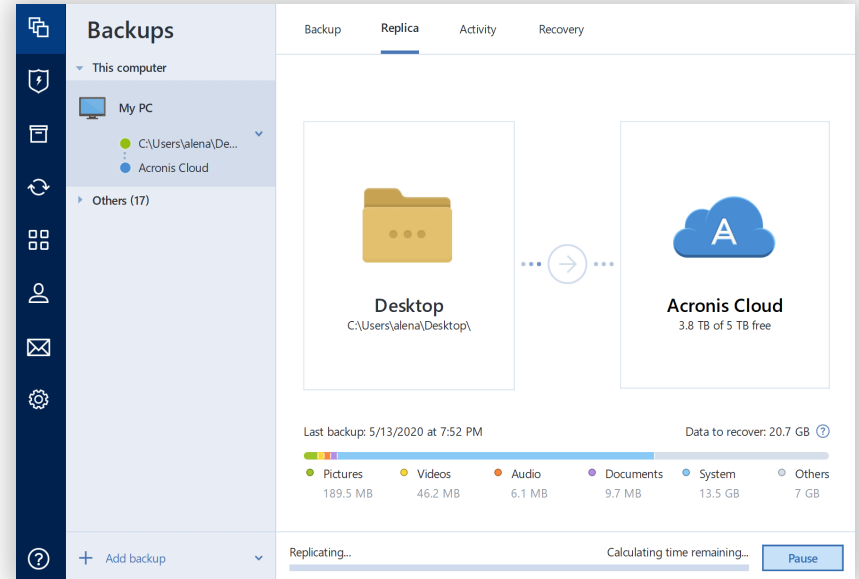

Resumable Replication

Resumable image backup replication assures that if replication was interrupted, the next replication process will not start from scratch, thus avoiding the duplication of data.

How to try

- Create a backup in Acronis True Image 2021
- Start to replicate it to Acronis Cloud
- Close to the end of the process, cancel the replication
- Launch the replication again

Platforms: Windows, Mac

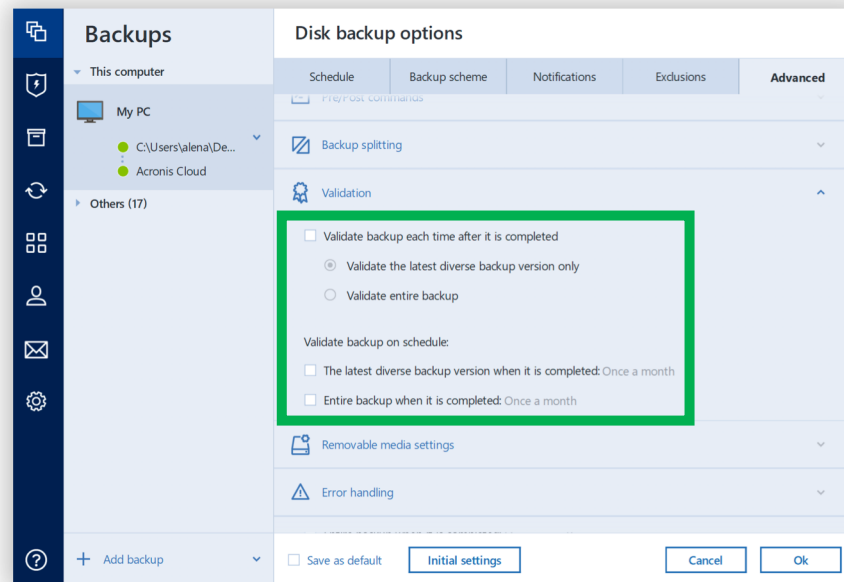

Quick Validation

Quick validation verifies the recoverability of the latest backup version and helps to speed up the regular validation process.

Quick validation can be launched manually or scheduled.

How to try

- Create several disk backups in Acronis True Image 2021
- Try to validate only the last version of the created backups

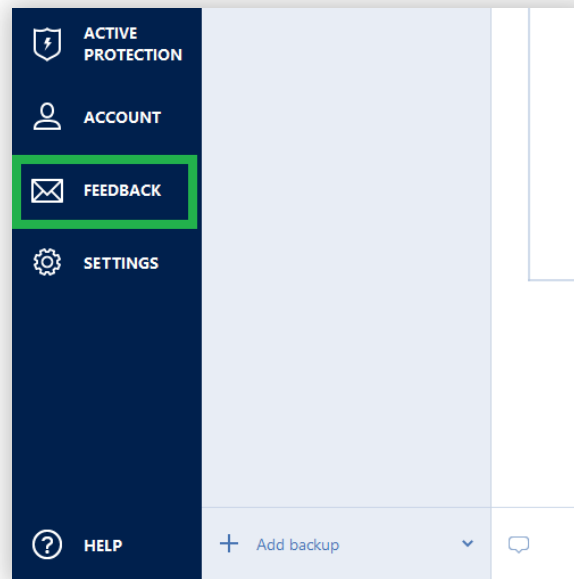

Platform: Windows

How to Send Feedback

To submit your feedback, please, use the **Feedback** button in the program interface.

Make your report more complete by including the following information

- Add a screenshot or photo to illustrate your observations. A sequence of screenshots that illustrate the steps leading to an issue is even better
- If you are reporting a technical issue, add the system report with product logs to your submission
