**Digital Defence Integration**

# EXTRACTS RELEVANT ACTIVITY STATUSES

**MSPs – Unleash your tech workforce with  
enhanced reporting.**

Acronis

The **4TRESS** tool was borne to provide MSPs with:

- Control of all MSP client inputs to a “Single pane of Glass”
- Exceptional manpower savings at all levels
- Alleviation of TechOps **ALERT FATIGUE**
- Revenue generation per workload/alert/user/workstation

# WE UPLIFT YOUR BUSINESS TO HIGHER GROUND

Contextually Correct and Meaningful Activity Status

Live Case study based on an MSP with 5000 workloads

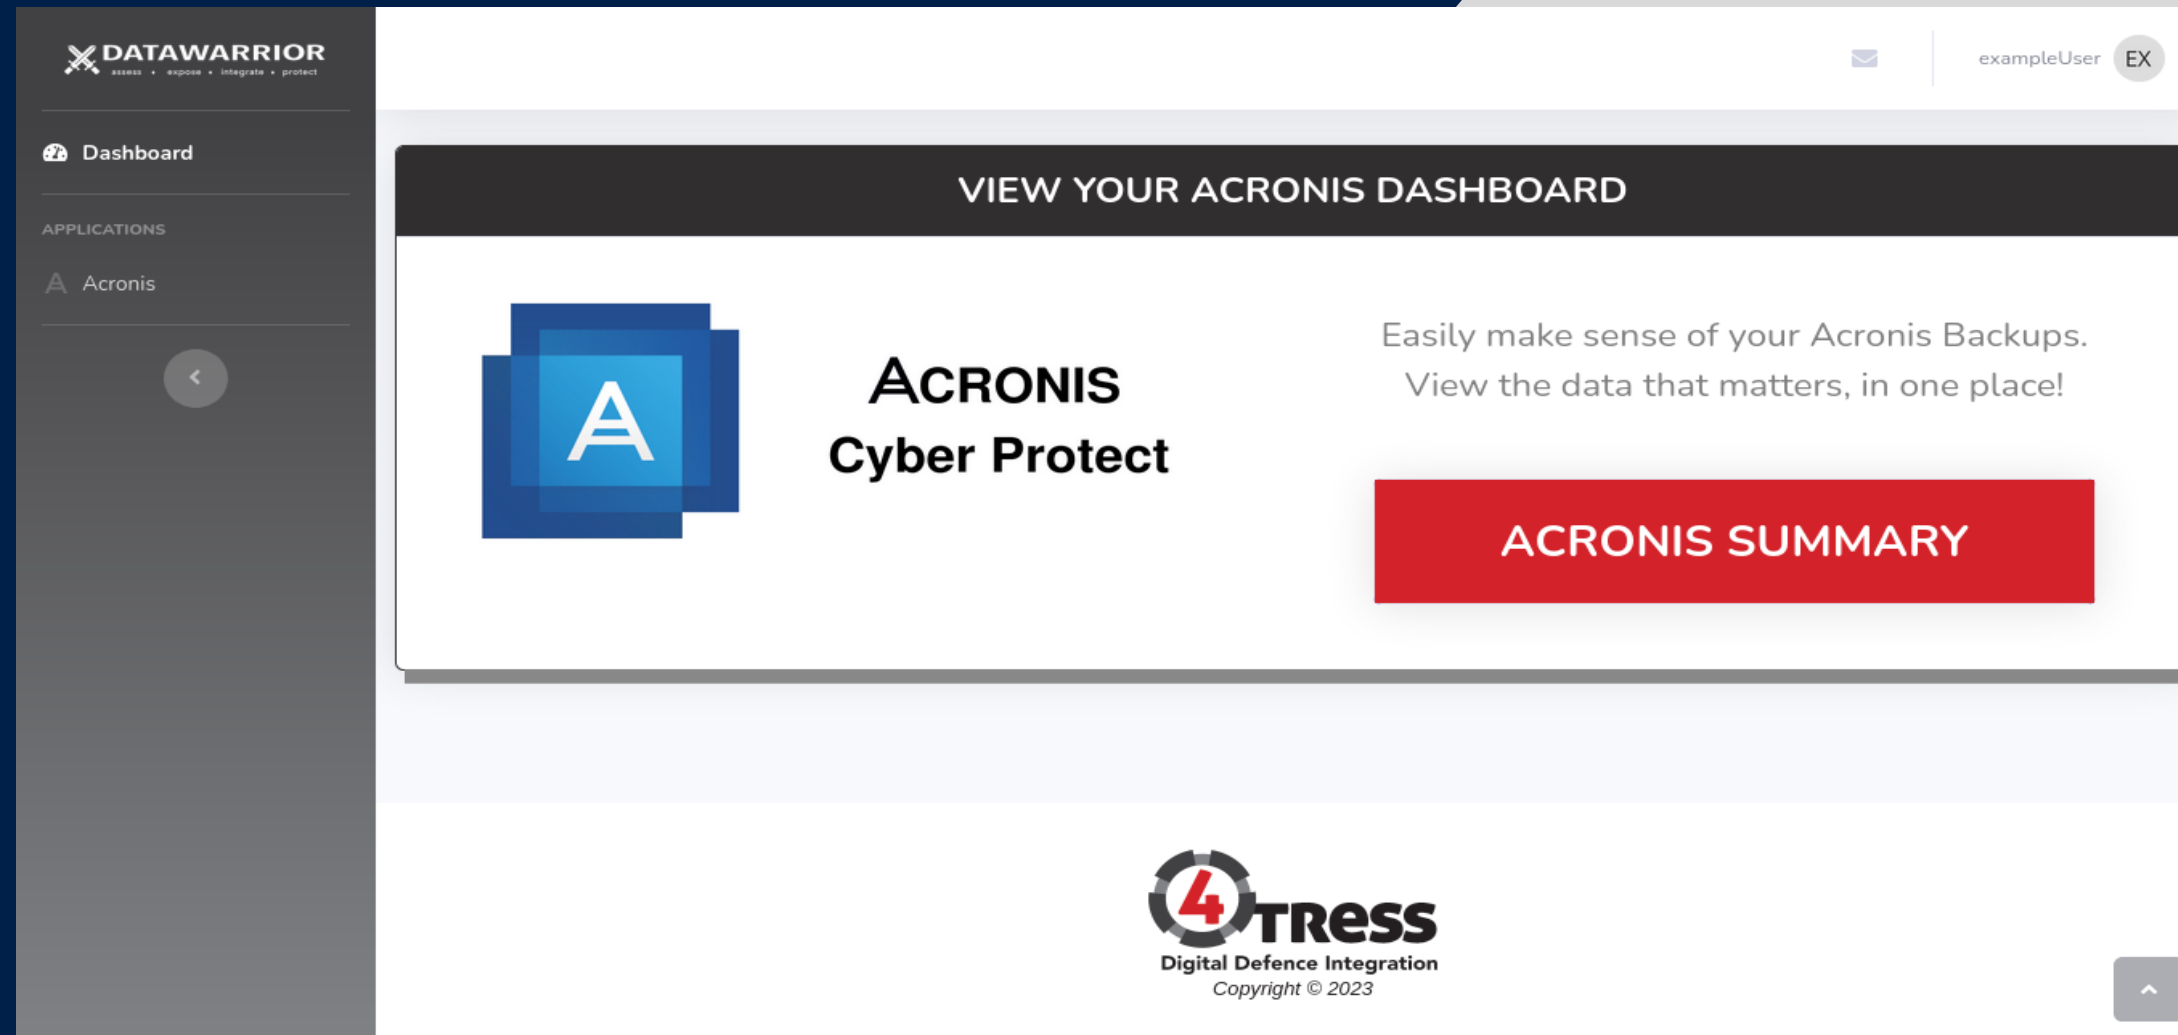

The Datawarrior team used an Acronis Platinum Service Provider MSP as a live test bed to develop the 4TRESS tool intended to efficiently and cost-effectively:

- Extract customised, relevant activity data out of the **Acronis** portal
- Present results in a “**Single Pane of Glass**” for ease and efficiency of management viewing and reporting

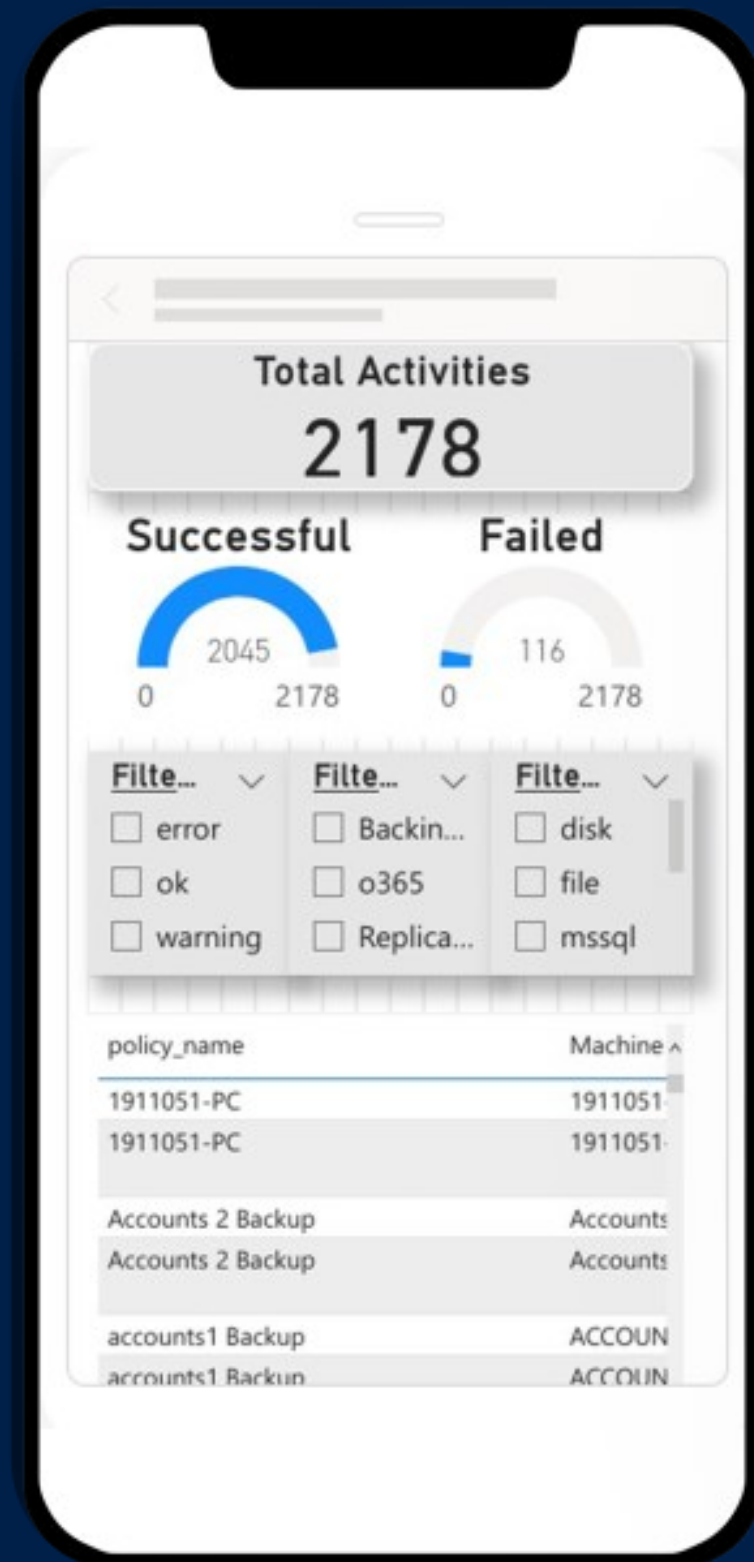

# FEATURES

- Extracts more relevant activity information from detailed Acronis reports
- A consolidated view of multiple vendor feeds using data intelligence and inbuilt experience
- A mobile interface for anytime anywhere access
- Delivering contextually correct and meaningful reports

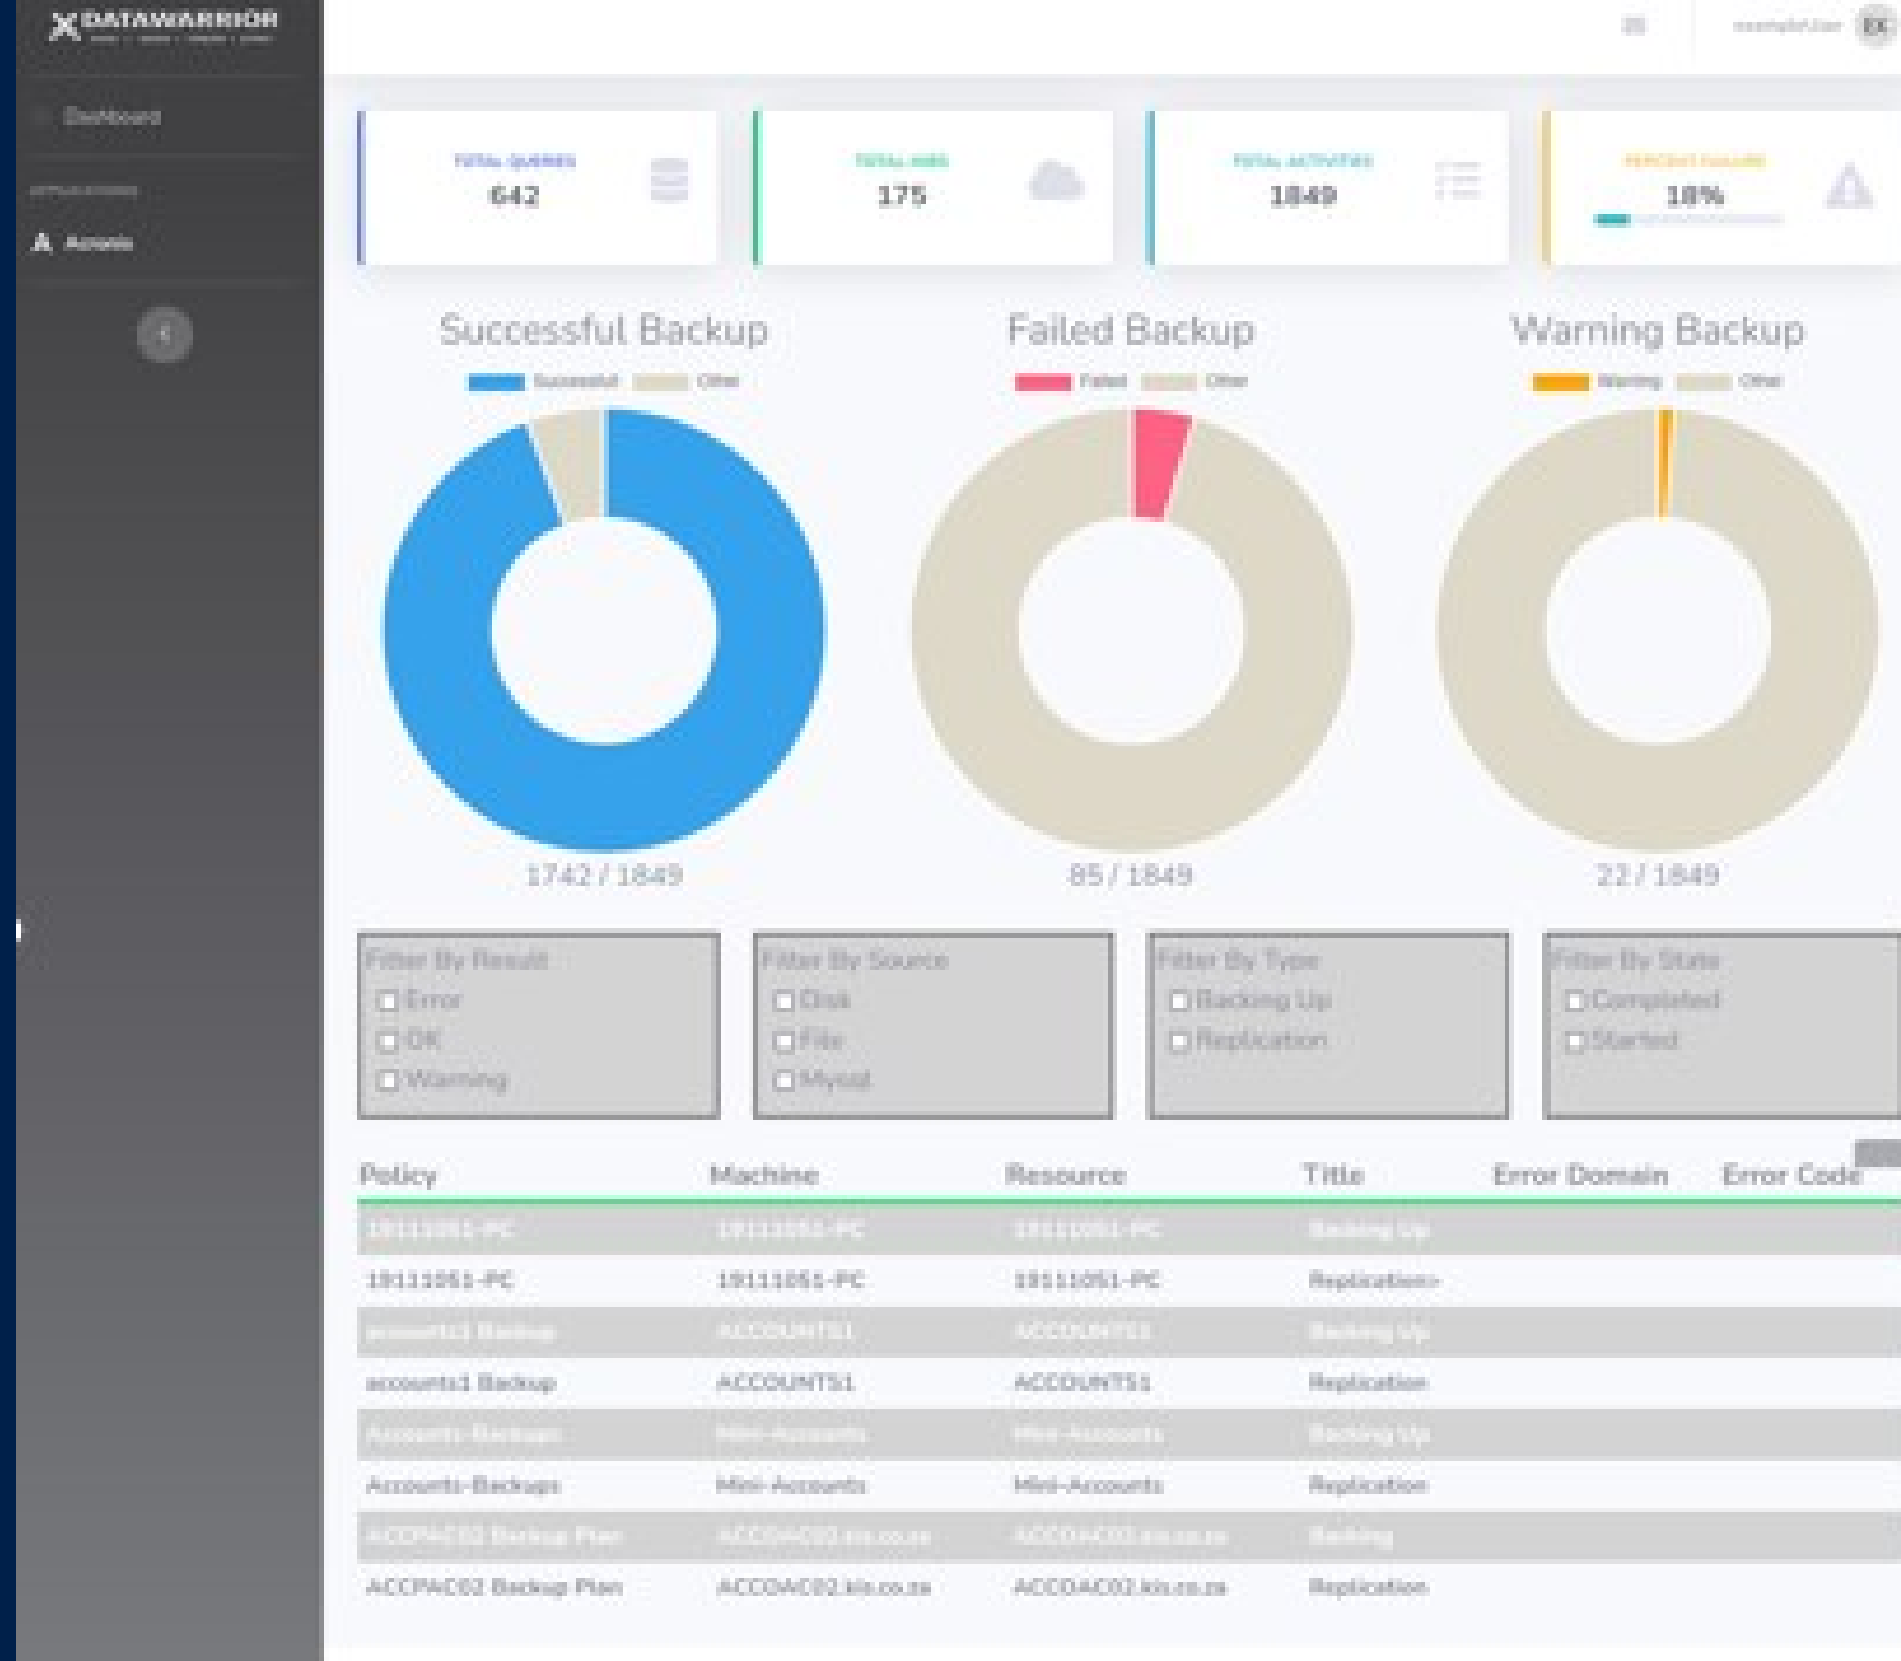

# FEATURE includes the mobile app.....

# SUBSTANTIAL BENEFITS

- Proven time/labor-related cost savings
- Significant reduction in response times
- Actively seek out and exploit engineering interventions and efficiencies
- Realtime data affording rapid response
- Simplified root cause analysis
- Upselling and cross-selling opportunities
