

Acronis Files Advanced

Acronis Files Advanced is an easy, complete and safe sync and share solution that effectively balances your employees' need to use any device with the organization's need for data security, privacy, visibility, compliance, and Bring Your Own Device (BYOD) support. Employees use any device to safely access corporate files and collaborate and securely share documents with other employees, customers, partners, and vendors. Designed exclusively for business, Acronis Files Advanced transforms mobile devices, including BYOD, into a natural extension of your business.

SECURE ACCESS, SYNC, AND SHARE SOLUTION

Content, Anywhere, Anytime

Acronis Files Advanced lets authorized employees access, sync, and share content that resides on corporate file servers, SharePoint®, Network Attached Storage (NAS), and Content Management Interoperability Systems (CMIS), such as Alfresco® and EMC® Documentum® using any device – iPhone® or Android® smart phones, tablets, laptops, PCs, or Macs®.

Microsoft Office Online Web Editing

Acronis Files Advanced now includes an option to allow users to view, edit, and create Office files using Office Online web editors. Office Online can even run on premises with Office Online Server.

More Collaboration Power and Control Users have more flexibility and control over shared materials. IT can define policies on file types, size, and properties.

Secure In-app Editing

Users can create and edit Office documents and PDFs within the Acronis Files Advanced mobile app, turning the mobile device in a true business platform.

Safe Web Preview Users have a faster and more secure view of sensitive and

important files using their sanctioned web browsers, without having to first download the document. This is a must-have feature for companies with stringent security and compliance policies.

Advanced Security and Control

The Acronis Files Advanced policy engine provides granular management capabilities to create security policies and ensures control and compliance for content, users, and devices.

Integration with Active Directory®

Acronis Files Advanced integrates with Active Directory for authentication, user account management, and device enrollment.

Tracking and Audit Trails

Acronis Files Advanced provides an enterprise-class audit trail and history for all transactions, including search, filter and export functions, giving IT visibility into what users are doing, what documents they access, and with whom they share documents.

Encryption Over-the-air and on-device encryption, including FIPS 140-2 certified encryption for iOS.

Easy-to-use User Interfaces – An intuitive and modern user experience makes it simple and natural for your employees use. Employees require virtually no training.

BENEFITS OF ACRONIS FILES ADVANCED

- **Empower your users** - users can easily access, create, and edit business files anytime, anywhere
- **Control your mobile world** – Sophisticated security controls, managed by the Acronis Policy Engine, give IT all the tools it needs to protect your company's critical data assets.
- **Drive competitive advantage** – Advanced use of mobile devices drives faster, more informed decision-making and ultimately improves revenue, profitability, and customer satisfaction.
- **Enable BYOD** – Employees can use their preferred devices while still giving IT complete control over content access and sharing.
