Acronis Backup 12.5 Advanced Universal License Promotion

Technology Evolves – Your Backup Should Too

20% discount off individual pricing now through December 31, 2017

Acronis Backup 12.5 Advanced Universal License promotion unlocks the full power of Acronis Backup 12.5 Advanced, couples it with Acronis Advantage Premier 24/7 support, and makes it easy for you to use all the features across all your systems and IT workloads. It gives you the power to protect all your systems, regardless of their location, while providing you the complete flexibility to recover to any other system, location, and environment. Backup a local VMware VM and recover it to a Hyper-V VM in the Azure cloud or to a Red Hat Virtualization VM in a private cloud. Whatever your environment, you don't need to think about it with the Acronis Backup 12.5 Advanced Universal License.

Future-proof your data protection with the Acronis Backup 12.5 Advanced Universal License promotion. You never have to worry about license management or missing features because you have access to all of the Acronis Backup 12.5 Advanced features for any supported system in your environment and anywhere you migrate your IT workloads in the future. It eliminates complexity in your environment by providing the ultimate in unlimited universal flexibility to move licenses between workloads, grow with your environment, and eliminate multiple license variations – it just works. And to make it even easier, you also get 24/7 product support via phone, chat, and email, including a 1 hour response time for critical problems, with the included Acronis Advantage Premier support.

The Details

Reduce RTOs to seconds with Acronis Instant Restore. Run any physical or virtual Windows or Linux system backup as VMware or Hyper-V VM with a few clicks and without standby hardware.

Prevent ransomware attacks with Acronis Active Protection, which detects and proactively blocks unauthorized encryption of files and backups.

Assert complete control over the location of your data, systems, and backups, improving regulatory compliance and ensuring data sovereignty.

Mitigate risks backing up and recovering your physical systems, hypervisor hosts, virtual machines, and cloud data. Evolve your business with any-to-any migration between different platforms, including cloud.

Protect your entire Oracle Database infrastructure, Exchange Server, SQL Server, SharePoint farm and Active Directory servers with complete disk-imaging backup and bare-metal recovery of your application servers. Reduce RTOs with granular recovery of individual databases, tablespaces, logs, mailboxes, contacts, projects, and more.

Reduce the impact of backup processes on your infrastructure by offloading VMware VM backup snapshots to NetApp SAN storage.

Enable IT to protect remote office, branch offices, and departments with the ability to manage, delegate, and establish roles for multiple administrators.

Increase infrastructure resiliency and quickly resolve issues with customizable dashboards. Get quick insights into your infrastructure, as well as regular, customizable reports so you can focus on the exceptions in your environment.

Back up your ESXi and Hyper-V hosts and restore the entire system (not just VMs) to the same or dissimilar hardware, avoiding the need to reconfigure your hypervisors.

Ensure the authenticity and integrity of backups by storing backup file checksum certificates in the blockchain database and detecting unauthorized changes to your backups before recovery.

Acronis Backup 12.5 Advanced edition is the world's easiest and fastest backup solution for all your data, whether it is located on-premises, in remote systems, in private and public clouds, or on mobile devices. Designed for hybrid-cloud environments, Acronis Backup 12.5 Advanced scales to support millions of devices managed from one web-based, touch-friendly user interface. The single pane-of-glass dashboard simplifies data protection across your entire organization and enables recovery anywhere in any environment.
